Uncle Tony's Specials

Appetizer – Stress-Free Choices

Indecisive? Skip the endless scrolling. Uncle Tony guides you step by step, helping you land on the perfect meal with confidence.

Entrée – Local Flavor, Made Simple

New in town or unsure what to try? Uncle Tony makes recommendations in plain conversation and even reaches restaurants without online ordering.

Chef's Recommendation - Accessibility for All

Blind or visually impaired? Our voice-first design ensures you can order seamlessly—no tapping, no swiping, just talking.

Soup of the Day – Advanced AI Service

Behind the warmth of Uncle Tony is cutting-edge conversational AI and call-through ordering that guarantees no craving goes unserved.

Desert - Our Promise

To make food ordering effortless, inclusive, and intuitive—so every person, in every situation, can enjoy the food they want with ease.

Spicy? I like your style! What kind of spicy? There's an Indian restaurant and a Mexican restaurant within 3 miles of you. Which one do you want? Or should I look further?

Milestones

Capture Audio	Voice Parsing	Responding	Local Search	Order Up!	Beauty Rest	Can I get a…	I'm Going to the Store…
Using the built-in microphone on devices to receive the audio of orders placed by customers.	Parse the captured audio for the customers order using the web speech API.	Intake the words of an order and feed them to a personalized LLM waiter/waitress who talks back.	Integrate with an API that allows looking up of local restaurants and menus to serve the customer.	Integrate with an API that allows Chef Tony to place orders with customer approval.	Design and implement a Professional UI that still captures the comforting feeling of Uncle Tony	Use programs that allow Chef Tony to place calls and make orders to restaurants over the phone.	Incorporate a grocery service for customers to talk through their grocery lists and have it delivered.
